## EMPLOYMENT HISTORY

### Frontend Software Engineer (React, TypeScript)

Fieldbox (Bordeaux) - Oct, 2022 - May 2024

Leverage data science and AI to empower clients with valuable assets. Contributed to diverse projects across the energy and construction industries:

- Developed 8 different web applications for various clients, both from scratch and by improving existing applications.
- Utilized React and TypeScript for all applications.
- Participated in multi-disciplinary teams, collaborating to create applications that met client expectations.
- Led the internal Frontend community, sharing experiences and developing internal tools.
- Enhanced the internal component library and composed frontend recipes for the team.

### Frontend Developer (React, TypeScript)

Tudigo (Bordeaux) - May, 2022 - Oct, 2022

FinTech startup helping small and medium-sized companies finance their projects and enabling individuals to make impactful investments. As part of the Product Team, I was responsible for:

- Collaborating closely with creatives to design the most pleasant UX/UI.
- Ensuring both investors and companies felt confident about our product by providing a clear and secure payment path.
- Improving the completion rate for new investors from 33% to 70% by reshaping their qualification path.

### Frontend Developer (React, TypeScript)

Großjungig (Berlin) - Mar, 2022 - Apr, 2022

Following the Ukrainian crisis, Großjungig, a startup, transformed its model from a multi-generational co-living solution to one that helps refugees find temporary accommodation. I volunteered and assisted the team in transforming their website to align with this new objective:

- Reshaped the header and landing page to display the different sections accessible to house providers and refugees.
- Managed the translation logic to expand the website from 2 languages to 5 languages.

## EDUCATION

### Wild Code School

Remote - Sep, 2021 - Jan, 2022

- 5-month (700-hour) remote coding boot-camp consisting of a teacher and 15 students.

- HTML, CSS, JavaScript, React, Git, GitHub, Agile methodologies

### KEDGE Business School

Master in Management - 2008-2012

The MIM is a two-year programme (Master 1 & Master 2) designed around three key components of KEDGE's strategy: entrepreneurship, tech management and common good.

## HOBBIES

**Sports:** I played Rugby when I was younger. Now I run marathons, and practice Yoga whenever I can.

**Gastronomy:** I always loved to cook, and my passion for wines and spirits (especially whiskies) goes along with this.

**Video Games:** Always been a special thing for me. I love Nintendo games, The Legend Of Zelda series being an all time favorite
